

A Journal of the Crazy Year

THIS BOOK WAS SUPPOSED TO BE MAKE BELIEVE. Some action-adventure novels have a ripped-from-the-headlines feel. With *A Journal of the Crazy Year* its the other way around: Real-life events are ripping headlines from the novel. By February of this year (2015) it was already eerily prophetic enough to warrant a nearly two-hour discussion on Coast to Coast AM in front of 3 million radio listeners. And that was BEFORE headlines announced a homicidal airline pilot and the return of the sleeping sickness, exactly as predicted in the novel. John Cruz awakens to find himself in unfamiliar surroundings. He learns that hes been in a mental hospital for nearly three years confined there for a crime he does not remember, a crime the hospital staff refuses to discuss with him. But then he discovers something even more bizarre. While he and other mental patients like him have been mysteriously recovering, the rest of the world has begun a descent into madness, thanks to a mysterious disease that causes many of its victims to go violently insane. Meanwhile, overhead a spectacular apparition splits the skies, as the largest comet in recorded history makes a close approach to the planet Earth. And some believe theres a connection. Now John has just one goal: to protect the woman he loves from the growing chaos. And to go forward, he will have to repair his relationship with God. By acclaimed sci-fi writer Forrest Carr, named as a Kirkus Reviews 2015 Author to Watch, *A Journal of the Crazy Year* is based on a real-life pandemic that has struck twice before in human history--and which may have recently returned, exactly as foreshadowed in the novel.
