

This PDA companion software gives rapid access to all the drug information you need - at the convenient tap of a stylus. It contains the same great features found in the book to promote safe medication administration and prevent drug administration errors, such as Do Not Crush and Alert icons, high alert drug identification, FDA mandated Tall Man spellings for easily confused drug names, specially grouped administration-route considerations, highlighted lifespan considerations, hundreds of special new do-not-confuse headings, and overdose treatment. In addition to content found in the book, this PDA software also includes handy calculators - essential tools when verifying dosages prior to administration. The PDA software is navigated using the MobiPocket ReaderPro, making it virtually platform-independent. The ReaderPro is small enough that it will not slow down even older devices, and it offers many useful built-in features, including full text search, annotation and highlighting capability, bookmarks with easy link-style navigation, adjustable font size, type, text alignment, and color, multiple indexes, removable memory card support, and a customizable toolbar. The Similar Drug Names Database puts over 1,700 drug name pairs at the users fingertips for quick, efficient confirmation and patient safety. Nursing Drug Dosage Calculators provide users with quick, portable confirmation of key drug calculations. All High Alert drugs are clearly identified to help nurses identify drugs most likely to cause patient harm. Features more than 100 Do Not Crush icons to denote drugs that may not be administered in crushed form. Features Research headings to denote drugs involved in current key research studies. Features more than 1,100 complete drug monographs, plus: drug categories; syringe and IV compatibility guides; multiple, extensive indexes by drug name,

diseases, and more; vaccines and toxoids; antitoxins and antivenins; more than 900 combination products; high-alert drugs; FDA pregnancy categories; and a controlled substances chart. Organizes more than 1,300 generic drugs (encompassing more than 4,500 trade names) in a comprehensive index for quick access. Provides extensive nursing considerations in a concise, practice-oriented framework: Assess, Administer, Perform/Provide, Evaluate, and Teach Patient/Family. Offers lifespan content via coverage of geriatric, pediatric, and pregnancy considerations throughout. Highlights common and life-threatening side effects in different typefaces for easy identification, with side effects grouped by body system. Highlights critical nursing considerations with a special Nursing Alert icon to identify considerations that require special attention. Includes Do Not Confuse headings to identify over 1,700 reported pairs of easily confused drug names, each integrated into drug monographs for ease of access. Features over 4,700 potential interactions between drugs and herbal products, denoted by an eye-catching icon. Features boldface route subheadings (IM, PO, etc.) under the Dosage and Routes and the Administer monograph subheadings to help the user find information quickly. Groups IV drug information under the monograph subheading Administer, with a boldface IV heading ensuring that all of the IV drug administration content is grouped together in one easy-to-find place. Includes all drug compatibility information under the Administer monograph subheading to make this crucial information easy to locate. Includes the names and uses of approximately 75 of the most commonly used herbal products. Lists over 1,700 pairs of look-alike/sound-alike drug names have been integrated into a quick-reference appendix. Contains approximately 20 new drugs recently approved by the FDA to provide the very latest drug information. Presents more than 2,000 new

drug facts, including patient/family teaching guidelines as well as updated drug interactions, side effects, precautions, contraindications, and IV therapy facts.
