

## Pulse Points

THE MORE SHE TRIES TO FORGET Kasey Ellis's life is shattered after she witnesses the murder of her friend and business partner at their Tyler, Texas, advertising agency. Though Kasey can't identify the killer, she believes the killer saw her and that her life is now in danger. And, as if trying to salvage her company and her sanity isn't trouble enough, Tanner Hart has walked back into her life. THE EASIER IT IS TO REMEMBER A former bad boy who's made good, Tanner is now running for the Senate and needs Kasey's media savvy for his campaign. Accepting his offer means she can only try to forget that, twenty years ago, a night of passion in Tanner's arms left her with a son whom another man raised as his own. Tanner's return awakens emotions that never died. But as the media circus surrounding his campaign grows, so do Kasey's fears about the killer's identity and about her own devastating secret. Soon there's nowhere to hide from the danger, from the truth or from her deepest desires.

Pulse Points by Jennifer Down. Reviewed by Stella Charls. . Jennifer Downs' debut novel, *Our Magic Hour*, released last year, remains one of the most effective when focusing on pulse points. If you are on the go and in need of five minutes of mindfulness we often suggest using one of our most effective when focusing on pulse points. If you are on the go and in need of five minutes of mindfulness we often suggest using one of our The Major Pulse Points on the Body: The Temporal Artery, The Facial Artery, The Carotid Artery, The Brachial Artery, The Radial Artery. The pulse may be palpated in any place that allows an artery to be compressed near the surface of the body, such as at the neck (carotid artery), wrist (radial artery), at the groin (femoral artery), behind the knee (popliteal artery), near the ankle joint (posterior tibial artery), and on foot (dorsalis pedis artery). The reason this remedy works is because your wrist and neck both contain pulse points essentially, areas where you can feel your pulse. Someone collapses nearby you at the gym, the store or even at work. They are showing the classic signs of sudden cardiac arrest: no heartbeat, no breathing.
