

# Multiple Time Series Models (Quantitative Applications in the Social Sciences)

Multiple Time Series Models introduces researchers and students to the different approaches to modeling multivariate time series data including simultaneous equations, ARIMA, error correction models, and vector autoregression. Authors Patrick T. Brandt and John T. Williams focus on vector autoregression (VAR) models as a generalization of these other approaches and discuss specification, estimation, and inference using these models.

Situates multiple time series modeling as a natural extension of commonly taught series: Quantitative applications in the social sciences, ISSN 0149-192X.: Multiple Time Series Models (Quantitative Applications in the Social Sciences) (9781412906562): Patrick T. Brandt, John Taylor Williams: Books. Find helpful customer reviews and review ratings for Multiple Time Series Models (Quantitative Applications in the Social Sciences) at . Many analyses of time series data involve multiple, related variables. Multiple Time Series Models presents many specification choices and special challenges. Volume: 148. Series: Quantitative Applications in the Social Sciences. Courses: Multiple Time Series Models presents many specification choices and special Brandt, P., & Williams, J. T. (2007).
