

Earthaways

We are not alone and haven't been for 30,000 years. Beings from another planet have been hiding among us and watching. They've been called elves, fairies, leprechauns and other names throughout our history. But humans are about to discover the truth. Suzanne, a primatologist at the Philadelphia Zoo, has published a book proposing that many creatures of legend are based on sightings of a real species of secretive intelligent primates. Denzel and Madonna, the Earth nicknames of a pair of adolescent leprechauns longing to be part of Earth society, are beginning to bend the rules that govern their lives. Two intelligent species on Earth are about to meet. Earthaways is quirky, tongue-in-cheek and fun with a fine sense of the ridiculous. (Warning: Contains adult material -- if you are an adult leprechaun)
